Due to an error in the production process, equation (8) is wrong in the published version. The correction version is displayed below:

$$\alpha(\eta) = \frac{1 + \eta - \frac{P(5, \eta)}{\eta P(3, \eta) - P(4, \eta)} - 3R(3, \eta)}{3R(3, \eta) + 3\left(1 - \frac{P(5, \eta)}{\eta P(3, \eta) - P(4, \eta)}\right)(1 - R(3, \eta))},$$
$$\lambda(\eta) = \sqrt{2} [1 - 3(1 - R(3, \eta)) \alpha(\eta)] \frac{P(3, \eta)}{\eta P(3, \eta) - 4P(4, \eta)} e^\eta. \quad (8)$$
